

2009 Search and Rescue Annual Report

Note from the Chairman:

As chairman of the Search and Rescue Advisory Board, I am pleased to issue this report reflecting the success of the Search and Rescue Financial Assistance Program. This program has successfully provided a means for reimbursement to local Search and Rescue Teams for the past twelve years, allowing them to fulfill their responsibilities and missions.

The number of Search and Rescue missions and consequently, the need for funding, continues to grow. Each participating county benefits from the program by receiving funding to reimburse costs associated with essential training, recovering costs incurred during search missions and to upgrade and replace needed equipment.

The charts and graphs in this report reflect not only the financial success of the program, but also the success of the missions of the Search and Rescue Teams.

It is my hope that the Search and Rescue Program will continue to assist you in meeting your search and rescue demands. On behalf of the Advisory Board, I would like to thank the dedicated search and rescue volunteers for their sacrifice and service that saves lives. A special thank you to the Advisory Board for their years of hard work, dedication and service.

Sincerely,

Lynn Nelson

The Search and Rescue Advisory Board*:

2009 Search and Rescue Annual Report

The House Bill

In 1997, John L. Valentine sponsored House Bill 32, creating the Search and Rescue Financial Assistance Program (SAR). The Act, relating to public safety, imposes a Search and Rescue surcharge or fee to off-highway registered or renewed vehicles, registered or renewed motorboats and sailboats, and annual wildlife habitat authorizations. These contributions are deposited into the State General Fund and dedicated to the Search and Rescue Financial Assistance Program.

These funds are available to reimburse counties for any reasonable costs incidental to search and rescue activities, not including any salary or overtime paid to any person on a regular or permanent payroll, including permanent part-time employees. Some of the approved costs are as follows:

- Rental for fixed wing aircraft, helicopters, snowmobiles, boats, and generators;
- Replacement and upgrade of search and rescue equipment;
- Training of search and rescue volunteers; and
- Any other equipment or expenses necessary or appropriate for conducting search and rescue activities.

The Search and Rescue Advisory Board has established the reporting requirements and reviews all submitted expenses.

Search and Rescue Data

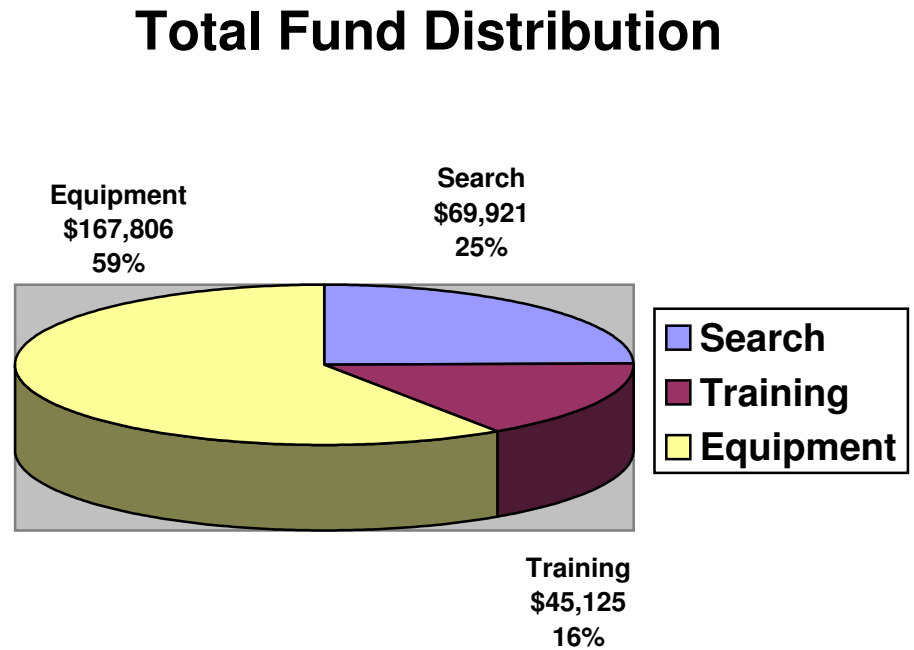

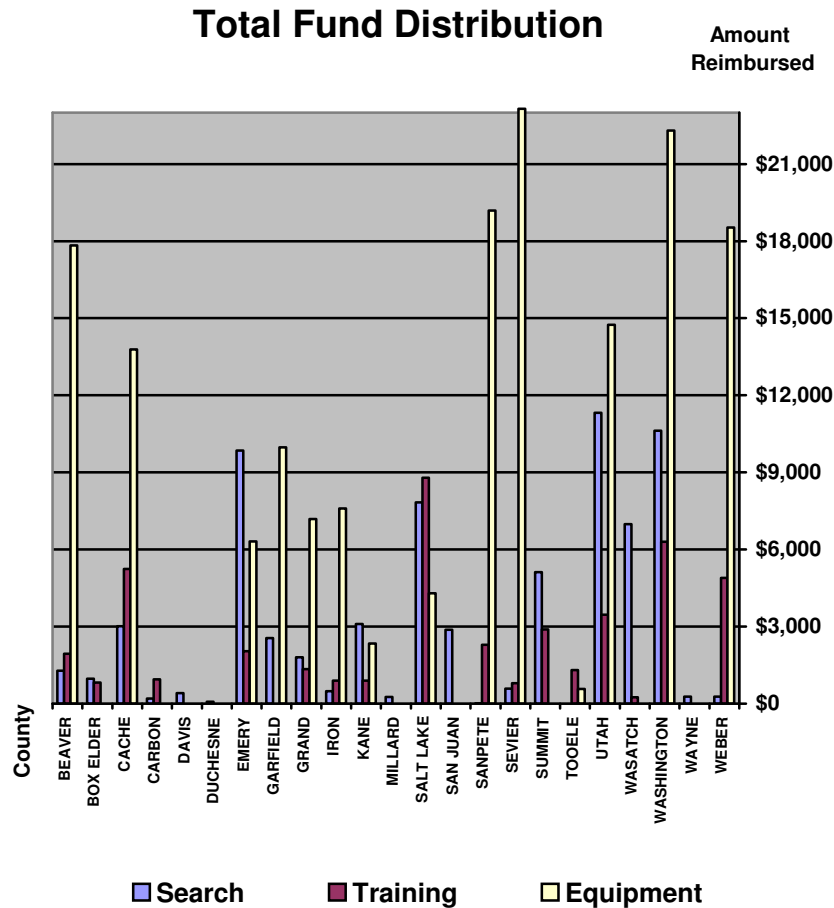

In Utah, each SAR mission is assigned a unique incident numbers to identify all reported events. All reports are filed with the Division of Homeland Security (HLS). The data from these incidents is entered into the SAR database and used to generate the statistics found in this report. The primary source of this data comes from the County Sheriffs' Offices, who respond to the majority of the missions in the state.

All the data found in this report is derived from the reports submitted by the county sheriffs. The database includes only partial data. If HLS does not receive a report, then the SAR missions for that county are not portrayed in the annual report.
